

Access for EveryBODY Initiative

Cerebral Palsy Alliance Research Foundation/Remarkable US

Goal: Raise awareness and vital resources for disabled assistive technology innovation.

Problem: Of the 2.5 billion people worldwide who need assistive tech to live, nearly half can't access it. Cerebral palsy (CP) affects 18 million people worldwide, and each person experiences it differently, often with co-occurring conditions.

Solution: Cerebral Palsy Alliance Research Foundation (CPARF) in partnership with Remarkable US, established the first nonprofit-funded disability technology start-up accelerator.

Initial Funding: \$800k
