

Autism Knowledge Gateway Initiative

Thought Leadership & Innovation Foundation

Goal: Helping facilitate Autism care through improved access to research and collaboration with peers

Problem: There is an increasing need for expanding and improving autism care. Significant research is being conducted, but there are challenges with accessing and utilizing the research.

Solution: A consolidated online repository of over 45,000 peer-reviewed research articles with peer collaboration. Where clinicians can search, review and discuss research with peers.

Initial Funding: \$1mm
